Experience

Applesoft

PHP Developer Intern

november 2022 – february 2023

Sharkia, Egypt

- Enhancing the user experience by enabling dynamic content updates using AJAX and jQuery.
- Resolving bugs and implementing new features in existing codebase.
- Proposing ideas to refactor the foundational code for better efficiency and maintainability.
- Collaborating with the team to understand client requirements and designing optimal database models.

Kalbonyan Almarsos

Software Engineer Intern

April 2022 – September 2022

Cairo, Egypt

- Gained a solid understanding of programming and knowledge of data structures and algorithms.
- Successfully built multiple projects within specified deadlines, utilizing JavaScript, React and Node.js.
- Learned AWS fundamentals and became a Certified Cloud Practitioner.

Projects

Crwn Clothing (E-Commerce APP)

[Website](#) – [Github](#)

React, Context API, Redux[Thunk, Saga], GraphQL, TypeScript, Firebase, Styled components, Stripe, PWA

- The project uses Redux Thunk, Redux Saga, and is a Progressive Web App for an enhanced user experience.
- utilizes GraphQL for optimized performance, while implementing TypeScript for type safety.
- The app leverages Firebase for authentication, database, and Stripe for secure payment processing.

Content Management System

[Website](#) – [Github](#)

PHP, SQL, MySql, MVC, OOP, PDO, Tailwind CSS

- The project is a CMS following the (MVC) and (OOP) design patterns.
- basic routing system maps HTTP requests GET, POST to specific functions based on the requested URI.
- Users can create, read, update, and delete (CRUD) posts and categories.
- Multi delete and update categories

Gitub Users

[Website](#) – [Github](#)

React, Context API, Auth0

- The app combines user authentication through Auth0 with a user-friendly interface that displays detailed profile information, repositories, followers, and following using data from the Github API.

Certifications

AWS Certified Cloud Practitioner
Complete React Developer
