PROJECTS

Crwn Clothing (E-Commerce APP)
<u>Website</u>   <u>Github</u>

React, Context API, Redux[Thunk, Saga, Toolkit], GraphQL, TypeScript, Firebase, Styled components, Stripe, PWA

- By utilizing React and Context API to manage the state. I have also leveraged Redux[Thunk, Saga] and Redux Toolkit to manage the state of the application more efficiently and handle async operations.
- I have converted the REST API to GraphQL, which demonstrate working with modern APIs and optimizing the performance of the application.
- I have converted the entire project to TypeScript, which showcases writing type-safe and maintainable code.

Gitub Users
<u>Website</u>   <u>Github</u>

React, Context API, Auth0

- displays the fetched data from Github API in a user-friendly interface that provides a detailed view of the searched user's profile information, such as their repositories, followers, and following.
- utilizes Auth0 to handle user authentication, ensuring that only authorized users can access the application.

Forkify (Recipe APP)
<u>Website</u>   <u>Github</u>

JavaScript, APIs, MVC architecture, OOP, async JavaScript.

- The use of APIs allows the application to fetch and display data in real time, making it valuable for users to find and save their recipes.
- The use of the MVC architecture and OOP allows for a modular and organized codebase
- the use of async JavaScript, such as Promises and Async/Await, allows for more efficient handling of async operations

Portfolio
<u>Website</u>   <u>Github</u>

NEXT.js, Tailwind CSS, Framer Motion.

- The project focus on creating a polished user experience and stunning website using Tailwind CSS and Framer Motion.
- Utilizes Next.js for building server-side rendered applications, and improving performance, SEO, and code splitting.

Content Management System
<u>Website</u>   <u>Github</u>

PHP, SQL, MySql, MVC, OOP, Tailwind CSS

- The project is a CMS following the (MVC) and (OOP) design patterns.
- basic routing system which maps HTTP requests GET, POST to specific functions based on the requested URI.
- Users can create, read, update, and delete (CRUD) posts and categories
- Multi delete and update categories

SUMMERY

I am a Full Stack Developer with a focus on Next.js and PHP. I am currently seeking a new challenge that will allow me to continue growing as a developer and contribute to innovative projects

EXPERIENCE

Software Engineer Intern
Kalbonyan Almarsos

- Focused on building multiple projects with HTML, CSS, JavaScript, React, Typescript, and Tailwind CSS.
- Learned AWS fundamentals and became a Certified Cloud Practitioner.
- learned how to work to tight deadlines without constant guidance from mentors

SKILLS

Next | React | SSG | SSR | CSR
TypeScript | JavaScript | Redux | ES6
HTML | CSS | SASS | Tailwind CSS
BootStrap | Jest | Webpack | PWA
Matrial Ui | Git | Framer Motion | PHP
MySQL | PostgreSQL | REST APIs
MVC | OOP | AWS | Firebase | GitHub
Vite | Shopify | Docker

Collaboration | communication | Creativity
organizational skills | Problem-solving
Creativity | Time Management | Adaptability

CERTIFICATIONS

AWS Certified Cloud Practitioner

Complete React Developer

EDUCATION

Bachelor Degree of Engineering
Zagazig University

📅 2018-2023

Online Coursework
Coursera, EdX And Udemy

📅 2022-2023
